

A HOME AWAY FROM HOME

Article by Jarka Kluth for 'The Grind' Concrete Industry Periodical

Keen on HiPERFLOOR™ but not sure how your clients will like it? After initial uncertainty, and then a very convincing test patch Christopher Bradley from Honed and Polished Concrete was able to demonstrate to clients just what a fantastic outcome they were about to achieve in their private dwelling.

The couple were looking for a finish that reflected their surfing/ traveling lifestyle. Located at the Alexandra Headland on the Sunshine Coast, the home away from their England base needed to be laidback, livable, stylish and easy to care for with scratch and stain resistant properties. A finish that would be reflective of their taste for the new and exciting. *Sam and Catherine "We just love our new floor. It contrasts perfectly with the new kitchen and furniture. It's everything we hoped for."*

Honed and Polished Concrete is an artesian concrete finishing company specializing in HiPERFLOOR™. Working collaboratively with local residential designers on the Sunshine Coast to create project specific solutions.
